W. K. R. S. I.

Are you prepared for the EPA's Coal Combustion Residuals regulations?

Western Kentucky Regional Services, Inc., WKRSI, has you covered with their permitted Subtitled D Landfill located on the Ohio River and serving the Midwest!

WKRSI, Permit # 113-00008, will be accepting MSW, special wastes, and CCRs including fly ash, bottom ash, gypsum, wet & dry scrubber materials and fluidized bed ash.

FACILITY INFORMATION:

Location: Union County, 2556 State Road 1508, Sturgis, KY 42459

Ohio River Mile Marker 870.1

Construction: 3rd qtr 2010 -- Operational by 3rd qtr. 2011

Permitted Air Space: 4.2 Million Cubic Yards

Potential Additional Airspace of 75 Million Cubic Yards

Design Features:

Liner & Cover System Design: Subtitle D facility, double synthetic liners with leachate collection—see diagrams

Monitoring: groundwater, leachate & methane gas.

RECOVERY AND LOADING SERVICES:

WKRSI will provide;

*equipment and services specific to your operation for recovery, handling, and loading of materials at your site.

*transportation logistics from your site to the permitted landfill,

* equipment and services for off loading of barges directly to the permitted landfill located adjacent to DeKoven Dock, Inc. Ohio River Mile Marker 870.1

PRICING:

WKRSI will provide rates upon request for specific services.

WKRSI will also provide customers the availability to “Mortgage Airspace”

Customers may also realize economic advantages of WKRSI providing these services as an O&M Cost vs. Capital Costs of total operation.

Environmental Advantages:

Transporting materials to this permitted site by barge offers the most economical and environmentally friendly option with respect to waste disposal.
